18.93 LITERS  
8.5 LBS. PER GAL @ 68 ° F  
615 GRAMS PER LITER @ 20 ° C**

### PRODUCT INFORMATION

The main benefits of adding organic matter to the soil are improved moisture holding capacity, aeration and water penetration. Improved soil blocks, increased negatively charged colloidal particles capable of holding and exchanging nutritive cations. Increased buffering effects by decreasing the tendency for an abrupt pH change in the soil when acid or alkaline substances are added. Increased formations of metal complexes, thus stabilizing soil micro-nutrients that otherwise might not be available.

### SUGGESTED USES

#### SOIL APPLICATION RATES

**Drip Systems and Drip Tape** — 1 - 8 quarts (1-8 liters) per acre, application depending on the crop and its growth stage. If a pre plant fertilizer is used, a total of 2 - 5 gallons (8-19 liters) **ORGANIC BASE** is recommended. If a pre plant fertilizer is not used a total of 5 -10 gallons (19 - 38 liters) per acre throughout the growing season is recommended.

**Sprinkler Systems — Flood Irrigation** — These systems are not as effective for fertilizer application as drip systems. For best results, follow drip recommendations. A pre plant or side dress application often is required for this type of irrigation system.

#### Foliar Application — Air or Ground Rig

**Tree Crops** - 1 quart (1 liter) per acre  
**Vegetable Crops** - 1 pint (½ liter) per acre  
**Field Crops** - 1 pint ( ½ liter) per acre

**DILUTION RATES** — Use a minimum of 10 gallons (38 liters) of water per acre.
