#### PRODUCT INFORMATION

FIELD CROP MIX was designed as a micronutrient mix for drip irrigation systems to give an added boost of certain micronutrients that are generally beneficial during the growing season.

#### SUGGESTED USES

#### SOIL APPLICATION RATES

**Drip Systems and Drip Tape** — 1-8 quarts (1-8 liters) per acre, application depending on the crop and its growth stage. If a pre plant fertilizer is used, a total of 2 - 5 gallons (8-19 liters) **FIELD CROP MIX** is recommended. If a pre plant fertilizer is not used a total of 5 -10 gallons (19 - 38 liters) per acre throughout the growing season is recommended.

**Sprinkler systems — Flood Irrigation** — These systems are not as effective for fertilizer application as drip systems. For best results, follow drip recommendations. A pre plant or side dress application often is required for this type of irrigation system.

#### Foliar Application — Air or Ground Rig

Tree Crops —1-2 quarts per acre Vegetable Crops —1-4 pints per acre Field Crops —1-4 pints per acre

**DILUTION RATES** — Use a minimum of 10 gallons (38 liters) of water per acre.
