PRODUCT INFORMATION

USES:

HUMIPLUS™ ORGANIC BIO-STIMULANT 75 can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses, and most other crops.

HUMIPLUS™ ORGANIC BIO-STIMULANT 75 is a concentrated technical Bio-Stimulant liquid which is compatible with most fertilizers and micronutrients to help produce nutrient healthier crops.

HUMIPLUS™ ORGANIC BIO-STIMULANT 75 may aid in the uptake of micronutrients.

In the production of a fertile soil, organic Bio-Stimulants play a direct part as they are the sources of plant nutrients which are liberated in available forms during mineralization. But organic substances also play an indirect role. Besides being a source of nutrients for the plant and the most important factor in structure formation, organic matter has also a fundamental effect on the physical properties of the soil, (water-holding capacity) and determines to a larger degree such physico-chemical properties as the exchange capacity and buffering properties; these properties are of great importance not only in controlling the uptake of nutrients by the plant and their retention in the soil, but also in suppressing the deleterious effect of soil acidity. There is also conclusive that quite small amounts of certain organic substances (highly dispersed organic bio-stimulants) have a definite positive effect on the growth and development of the plant.

APPLICATION RATES

Recommendations:

Soil and Foliar Applications

Turf - 10 - 15 ounces per acre. Apply every two weeks to maintain color and growth.

Plants - 8 - 12 ounces per acre. Apply 1 - 2 times per month to maintain color and growth . For backpack - 2 ounces per 3 gallons of water.

Trees - 10 - 20 ounces per acre. Apply monthly.

Crops - General use rate 10 - 15 ounces per acre bi-monthly

Can be used with Drip Irrigation, Fertigation or Flood Irrigation.
