

NUTRAPLEX®

GRAPE MIX #1

COMPLEXED MICRONUTRIENT
To Prevent and Correct Micronutrient
Deficiencies

GUARANTEED ANALYSIS

Magnesium (Mg)	1.00%
Sulfur (S)	3.00%
Boron (B)	1.00%
Cobalt (Co)	0.002%
Copper (Cu)	0.08%
Iron (Fe)	0.25%
Manganese (Mn)	0.25%
Molybdenum (Mo)	0.005%
Zinc (Zn)	2.50%

Derived From Magnesium, Copper, Ferrous, Manganese, and Zinc Sulfates.
Sulfur derived from Sulfuric Acid. Boron from Sodium Borate. Cobalt from Cobalt Sulfate. Molybdenum from Sodium Molybdate. Complexing agent from Lignosulfate.

PRODUCT INFORMATION

CROPS

NUTRAPLEX GRAPE MIX can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses, and most other crops.

NUTRAPLEX GRAPE MIX is a complexed liquid micronutrient for foliar and soil application to agricultural crops. **NUTRAPLEX GRAPE MIX** is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue and root system of the plant and can be translocated within the plant. **NUTRAPLEX GRAPE MIX** is compatible with most insecticides, fungicides, herbicides, liquid fertilizer, and other foliar micronutrients. It is used on most field and row crops, trees, vines, turf, and ornamentals. **NUTRAPLEX GRAPE MIX** can also be used as an acidifying and dispersing agent in water solutions.

NUTRAPLEX micronutrients are unique in that they can be used in most forms of liquid fertilizers including some ammonia solutions. **NUTRAPLEX** micronutrients can be broadcast on the surface of the soil in water solutions, in fluid fertilizers including suspensions, or in particulate form. **NUTRAPLEX** can be banded at planting time, side-dressed, or sprayed in water solutions directly on deficient plants. Under irrigation, **NUTRAPLEX** micronutrients can be added to the water of gravity and sprinkler systems. Under dry land conditions, **NUTRAPLEX** micronutrients can be applied ahead of disking, plowing, or listing. When applied to soil, **NUTRAPLEX** micronutrients can be used in combination with a nitrogen fertilizer source.

APPLICATION RATES

2 qts per acre every three weeks. Or 1.5 gallon total per acre in nine weeks. Use additional product when deemed necessary.

CAUTION: The application of fertilizer materials containing molybdenum may result in forage crops containing levels of molybdenum which are toxic to ruminant animals.

CAUTION: Excessive amounts of Boron may cause damage to susceptible crops.
