### PRODUCT INFORMATION

**START - UP Primary Blend** was formulated for use with basic starter fertilizers pH 6 or higher at planting time. **START-UP Primary Blend** can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone,

**START - UP Primary Blend** is composed of organic carriers of Citric Acid which forms a chemical bond when processed.

**START - UP Primary Blend** is a liquid plant food containing micronutrients. The micronutrients are chelated with Citric acid to provide easy mobility into the plant system.

**START - UP Primary Blend** micronutrients are formulated to provide a fast method to boost plants under nutrient stress periods and for correction of micronutrient deficiencies.

**START - UP Primary Blend** is compatible with most insecticides, fungicides, herbicides, nematicides and liquid fertilizers.

**START - UP Primary Blend** can be applied to most vegetable crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, strawberries, cotton, corn, small grains, sunflowers, sugar beets, mint and most other crops.

**CAUTION:** The application of fertilizer materials containing molybdenum may result in forage crops containing levels of molybdenum which are toxic to ruminant animals.

**CAUTION:** Excessive amounts of Boron may cause damage to susceptible crops.
