APPLICATION METHOD & SAFETY:	<p>BLEND is in the form readily absorbed by plant tissue. In this form, nitrogen, phosphorous and potassium can be applied to the growing plant.</p> <p>Applications of BLEND early in the plants life can encourage earlier development, increased growth, and vigor. BLEND may effectively be applied at the first to second true leaf stage as a directed spray to the small plant. When spraying young plants use ground application equipment and use "sprayed acres" to determine amounts of spray to be applied.</p>
