## CROP ENHANCER

### 1.5 - 1 - 18

with Chelated Micronutrients and Contains Enhance\* (THA) Technical Humic Acids

#### GUARANTEED ANALYSIS

Total Nitrogen (N).....	1.5%
0.7% Ammoniacal Nitrogen	
0.8% Nitrate Nitrogen	
Available Phosphoric Acid (P <sub>2</sub> O <sub>5</sub> ).....	1.0%
Water Soluble Potash (K <sub>2</sub> O).....	18.0%
Magnesium (Mg) .....	0.050%
Iron (Fe) Heda .....	0.010%
Zinc (Zn) EDTA .....	0.005%
Manganese (Mn) EDTA .....	0.005%
0.05% Chelated Manganese	
Copper (Cu) EDTA .....	0.005%
0.05% Chelated Copper	
Sulfur (S) (combined).....	12.000%

**DERIVED FROM :** Diammonium phosphate, potassium nitrate, potassium sulfate, copper ETA, iron HETA, manganese EDTA, zinc EDTA, magnesium EDTA, The chelating agent is EDTA (ethylene diamine, tetra-acetic acid).

\* Also contains NON-PLANT FOOD 0.5% Humic Acids derived from Leonardite.

11 LBS. PER GAL @ 68 ° F  
1229 GRAMS PER LITER @ 20 ° C**

#### PRODUCT INFORMATION

HUMIPLUS CROP ENHANCER is an all purpose product to mature a crop and improve quality.

CROP ENHANCER is a well balanced liquid plant food containing the **primary** and **secondary** plant nutrients. The **secondary** plant nutrients are chelated with EDTA to provide fast break and ease of mobility into the plant system.

CROP ENHANCER liquid foliar fertilizer was formulated to provide a fast method to boost plants during critical or high growth periods, damage due to weather and for correction of nutrient deficiencies. **An excellent product to mature a crop and improve quality.**

CROP ENHANCER promotes healthy seed and root development as well as a strong cell structure when used as a supplement to a soil fertilizer program. Micro-Nutrients are needed for healthy seed development, root structure and cell structure, especially in soils where the nutrients have been depleted in sufficient quantities to cause reduced yields or stunted plants. CROP ENHANCER insures against these nutrients deficiencies providing the essential nutrient deficiencies providing the essential nutrients to stimulate early root development and speed up plant growth.

CROP ENHANCER liquid nutrients contain ENHANCE\* (THA) Technical Humic Acids to help promote rapid absorption through the leaf tissue and root system of the plant. CROP ENHANCER nutrients are available for plant food and non-phytotoxic when used as directed.

#### SUGGEST USES

**Apples, Apricots, Peaches, and Plums:** One to three gallons/acre four times each season starting at first full leaf, then at fruit set, fruit size and fruit color.

**Walnuts - Almonds:** One to four gallons/acre three times each season starting at first full leaf.

**Grapes:** One to three gallons/acre four times each season starting at first full leaf, then past bloom, early bunch set, berry size and at berry color.

**Cotton:** One to three gallons/acre four times each season starting at first true leaf then first boll set, maximum boll set and two weeks before defoliation.

**Tomatoes:** One to three gallons/acre four times each season starting at first true leaf then at early fruit set, fruit size, fruit color and one week before harvest.

**Sugar Beets:** One to three gallons/acre three times each season starting at first full leaf. Last application should be at mid-season.

**Alfalfa:** One to three gallons/acre immediately after each cutting during the season and three to four gallons/acre after the final cutting of the season.

**Wheat - Barley - Oats - Rice:** One to three gallons/acre at tillering and again at early cough stage.

**Corn:** One to three gallons/acre three times each season at three week intervals.

**Lettuce - Celery - Cole Crops:** One to two gallons/acre four times each season starting at second true leaf and with the last application two weeks before harvest.

**Asparagus:** One to three gallons/acre two times while fern is full and two to four gallons/acre two weeks before fern turns yellow in the fall.

**Strawberries:** One to two gallons/acre at first early fruit set and after each picking.

**Potatoes:** One to three gallons/acre four to six times each season with the first at early emergence, then evenly spaced with the last application two weeks before leaf die-down.

**Citrus:** Two to four gallons/acre three times a year starting at early fruit set, then fruit size and early color.

**Aircraft and low volume sprayers:** Use a minimum of 10 gallons of water per acre per 5 gallons of CROP ENHANCER.

**Conventional sprayers:** Use a minimum of 20 gallons of water per acre per 5 gallons of CROP ENHANCER.
