

ENHANCE[®] THA

SPECIAL
8%

TECHNICAL HUMIC ACIDS Liquid Humate

NON-PLANT FOOD INGREDIENT
Humic Acids8%
Derived from Leonardite

TO MIX WITH AMMONIUM
PHOSPHATE CUT WITH WATER

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

KEEP OUT OF REACH OF CHILDREN

WARRANTY: Western Nutrients Corp. makes no warranty, express or implied, including the warranties of merchantability and/or fitness for any particular purpose, concerning this material, except those which are contained on the Western Nutrients Corp. label attached to the product container.

PRODUCT INFORMATION

CROPS

ENHANCE[®] Technical Humic Acids can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses, and most other crops.

ENHANCE[®] THA is a concentrated Technical Humic Acid liquid which is compatible with most fertilizers and micro-nutrients to help produce nutrient healthier crops. Humic Acids may aid in the uptake of micronutrients.

ENHANCE[®] is extracted from a form of Humus, Leonardite Ore. Appropriate amounts of Humus helps loosen compacted soils, improves cultivation and facilitates aeration and water penetration.

In the production of a fertile soil, humus substances play a direct part as they are the sources of plant nutrients which are liberated in available forms during mineralization. But humus substances also play an indirect role. Besides being a source of nutrients for the plant, and the most important factor in structure formation, humus matter has also a fundamental effect on the physical properties of the soil, (water-holding capacity) and determines to a large degree such physico-chemical properties as the exchange capacity and buffering properties; these properties are of great importance, not only in controlling the uptake of nutrients by the plant and their retention in the soil, but also in suppressing the deleterious effect of soil acidity.

The main benefits of adding humus matter to the soil are improved moisture holding capacity, aeration and water penetration. Improved soil blocks, increased negatively charged colloidal particles (humus) capable of holding and exchanging nutritive cations. Increased buffering effects by decreasing the tendency for an abrupt pH change in the soil when acid or alkaline substances are added. Increased formations of metal complexes, thus stabilizing soil micronutrients that otherwise might not be available.

APPLICATION RATES RECOMMENDATIONS

ENHANCE[®] Technical Humic Acid is a very concentrated form of humic acid salts and is recommended for use with fertilizers and micronutrients.

ENHANCE[®] IS NOT A PLANT FOOD.

ENHANCE[®] Technical Humic Acid is also recommended for use in irrigation systems. **ENHANCE[®]** can be added to the water of gravity, sprinkler systems, and drip systems.

PREPLANT:

Apply 1 - 3 quarts (1 - 3 liters) of **ENHANCE[®] THA** to each 30 gallons (1- 14 liters) of liquid fertilizer.

SIDE DRESS:

Apply 1 -3 quarts (1 - 3 liters) of **ENHANCE[®] THA** to each 30 gallons (1-14 liters) of liquid fertilizer per acre.

FOLIAR FEEDING:

A. Aerial Application: Apply 1-3 quarts (1-3 liters) of **ENHANCE[®] THA** with a foliar fertilizer in 5 -10 gallons (19-38 liters) of water per acre when crop is from three (3) to four (4) weeks old. Repeat as needed.

B. Ground Rig: Apply 1-3 quarts (1 - 3 liters) of **ENHANCE[®] THA** with a foliar fertilizer in 15 to 20 gallons (57 - 76 liters) of water per acre.

ENHANCE[®] THA can be used in transplant water at a rate of 1 - 2 gallons (4 - 8 liters) per acre. **ENHANCE[®] THA** can also be used in direct seed application such as rice at the rate of 1 - 2 gallons (4 - 8 liters) per 100 gallons (379 liters) of water.

Always mix **ENHANCE[®] THA** with materials that have a pH of at least 6.

ENHANCE[®] is a registered trademark of Western Nutrients Corporation.
