

8.42 LBS. PER GAL @ 68°F

941 GRAMS PER LITER @ 20° C

**GENERAL INFORMATION**

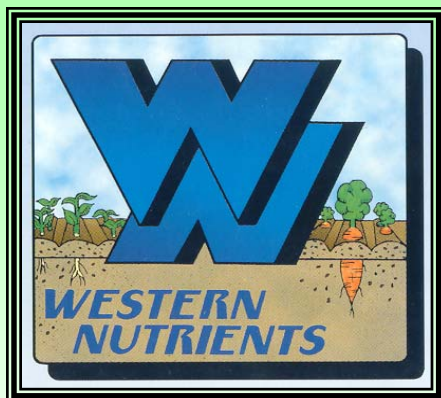

The master series is a premium fertilizer program designed for flowering plants in Hydroponics.

**DIRECTIONS FOR USE:**

Fill your reservoir with clean water before administering any nutrient or additive. Make sure that the water level in your reservoir is sufficient enough to effectively flood your desired area or table. Always wash your measuring cup immediately after adding and stirring in each nutrient. Never mix any nutrient together in their concentrated form. After adding and stirring in each nutrient, check and adjust the pH between 5.0 and 6.5. Keep the water temperature in your reservoir between 66 degrees and 75 degrees F. Drain your reservoir and pumps at least once a week to prevent any salt buildup. Please avoid storing in direct sunlight and protect from freezing.

**METRIC TO U.S. CONVERSION**

- 5 ML = 1 TEASPOON
- 15 ML = 1 TABLESPOON
- 30 ML = 1 FLUID OUNCE
- 946 ML = 1 QUART
- 3.79 L = 1 U.S. GALLON

**HYDROPONIC**

**.2 - 0 - .7**

**GUARANTEED ANALYSIS**

|                                       |     |
|---------------------------------------|-----|
| TOTAL NITROGEN (N).....               | .2% |
| AVAILABLE PHOSPHORIC ACID (P2O5)..... | 0%  |
| SOLUBLE POTASH (K2O).....             | .7% |

Derived From: Potassium Hydroxide, Ammonium Nitrate, and Nitric Acid.
