

10.6 LBS. PER GAL @ 68°F
1185 GRAMS PER LITER @ 20°C

PRODUCT INFORMATION

CROPS

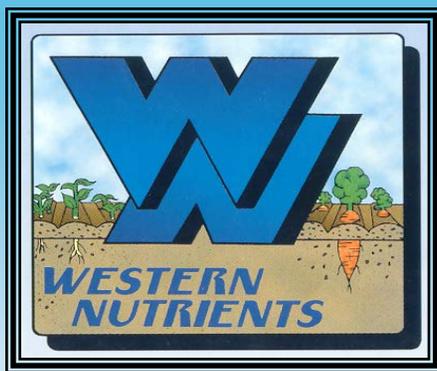

NUTRAPLEX 2-0-25 can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses, and most other crops.

NUTRAPLEX 2-0-25 is a complexed liquid micronutrient for foliar and soil application to agricultural crops. **NUTRAPLEX 2-0-25** is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue and root system of the plant and quickly translocated within the plant. **NUTRAPLEX 2-0-25** is compatible with most insecticides, fungicides, herbicides, liquid fertilizer, and other foliar micronutrients. It is used on most field and row crops, trees, vines, turf, and ornamentals.

NUTRAPLEX micronutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soil (pH 3) to high alkaline soil (pH 8.5) containing considerable calcium carbonate (free lime). **NUTRAPLEX** can be effective under most varied farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective **NUTRAPLEX** micronutrients are than other sources of micronutrients.

NUTRAPLEX micronutrients are unique in that they can be used in most forms of liquid fertilizers including ammonia solutions. **NUTRAPLEX** micronutrients can be broadcast on the surface of the soil in water solutions. In fluid fertilizers including suspensions, or in particulate form. This micronutrient can be banded at planting time, side dressed, or sprayed in water solutions directly on deficient plants. Under irrigation, **NUTRAPLEX** micronutrients can be added to the water of gravity and sprinkler systems. Under irrigation, **NUTRAPLEX** micronutrients can be applied ahead of disking, plowing or listing. When applied **NUTRAPLEX** micronutrients can be used in combination with a nitrogen fertilizer source.

Nutraplex is a Registered Trademark of Western Nutrients Corporation.

NUTRAPLEX® 2-0-25

COMPLEXED MICRONUTRIENTS

To Prevent and Correct Micronutrient Deficiencies

GUARANTEED ANALYSIS

Total Nitrogen (N)	2.0%
2.00% Urea Nitrogen	
Soluble Potash (K ₂ O).....	25.0%
Nitrogen derived from urea. Potash derived from complexed potassium hydroxide.

NET CONTENTS 5 GALLONS
18.93 LITERS

APPLICATION RATES

ALMONDS: 5 - 12 qts. per acre per application in pre- and post-bloom sprays or as needed.

APPLES: Western States: 2 - 12 qts. per acre per application in pre- and post-bloom sprays. Repeat as needed.

AVOCADOS: 1 - 4 qts. per 100 gals, and flush wet the foliage. By air or concentrate sprayer, 5 - 15 qts. per acre per application.

CITRUS (ALL VARIETIES): By air or concentrate sprayer: 2 - 25 qts. per acre per application in 15 to 100 gals, of water. By conventional ground rig: 2 - 4 qts. per 100 gals, and flush wet the foliage (up to 26 qts. per acre per application). In oil sprays: ½ qt - 1½ quarts per 100 gal. of spray mix.

CORN (SWEET & RELD): 1 - 4 qts. per acre per application.

COTTON: 1 - 8 qts. per acre per application.

GARLIC: 1 - 4 qts. per acre per application.

GRAPES: 2 - 8 qts. per acre per application. First application when new shoots are in the 4 to 6 leaf stage. Repeat as needed.

POTATOES: 2 - 8 qts. per acre per application. First application when plants are 4 to 12 inches high. Second application 3 weeks later. Repeat as needed.

CAUTION: Do not apply **NUTRAPLEX 2-0-25** to stone fruit within 3 weeks of harvest because of possible visible residue. Do not use **NUTRAPLEX 2-0-25** in foliar sprays on plants that are sensitive to potassium or urea application. **NUTRAPLEX 2-0-25** may be applied by ground (dilute or concentrate) or air. Apply in enough water for thorough coverage.
