PRODUCT INFORMATION

CROPS

NUTRAPLEX CMM can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses, and most other crops.

NUTRAPLEX CMM is a complexed liquid micronutrient for foliar and soil application to agricultural crops. **NUTRAPLEX CMM** is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue and root system of the plant and quickly translocated within the plant.

NUTRAPLEX CMM is compatible with most insecticides, fungicides, herbicides, liquid fertilizer, and other foliar micronutrients. It is used on most field and row crops, trees, vines, turf, and ornamentals. **NUTRAPLEX CMM** can also be used as an acidifying and dispersing agent in water solutions.

NUTRAPLEX micronutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soils (pH 3) to high alkaline soil (pH 8.5) containing considerable calcium carbonate (free lime). **NUTRAPLEX** can be effective under most varied farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective **NUTRAPLEX** micronutrients are than other sources of micronutrients. **NUTRAPLEX** micronutrients are unique in that they can be used in most forms of liquid fertilizers including ammonia solutions.

NUTRAPLEX micronutrients can be broadcast on the surface of the soil in water solutions, in fluid fertilizers including suspensions, or in particulate form. This micronutrient can be banded at planting time, side dressed, or sprayed in water solutions directly on deficient plants. Under irrigation, **NUTRAPLEX** micronutrients can be added to the water of gravity and sprinkler systems. Under dry land conditions, **NUTRAPLEX** micronutrients can be applied ahead of disking, plowing or listing. When applied to soil, **NUTRAPLEX** micronutrients can be used in combination with a nitrogen fertilizer source.

Caution: Nutraplex CMM contains copper. Copper can be corrosive to Black Iron Aluminum, and brass.

APPLICATION RATES

SOIL APPLICATION RATES

MAINTENANCE APPLICATIONS	1qt/acre(1 liter)
MODERATE DEFICIENCY	½ -1 gallon/acre (2 - 4 liters)
HEAVY DEFICIENCY	1 - 2 gallons/acre (4 - 8 liters)

In soil applications the usual carrier is water used at a rate sufficient for thorough coverage. **NUTRAPLEX CMM** can be applied with liquid fertilizers as a broadcast or banded treatment. Use **NUTRAPLEX** at a maximum rate of 1 part **NUTRAPLEX** to 50 parts fertilizer in ammonium phosphate solutions and 1 part **NUTRAPLEX** to 10 parts fertilizer in nitrogen solutions.

FOLIAR APPLICATION RATES

TREE CROPS ½ -1 gallon/acre (2 - 4 liters)

Apply **NUTRAPLEX CMM** on tree crops using the following dilution rates:

Aerial applications: Use a maximum of 1 quart (1 liter) of **NUTRAPLEX CMM** per 5 gallons (20 liters) of spray solution.

Dilute spray: Use a maximum of 1 quart (.1 liter) of **NUTRAPLEX CMM** per 200 - 500 gallons (800 - 2000 liters) of spray solution.

Concentrated spray: Use a maximum of 1 gallon (4 liters) of **NUTRAPLEX CMM** per 50-150 gallons (200 - 600 liters) of concentrated spray solution.

If trees are sprayed several times a year the above application rates can be split according to the number of yearly applications. Split applications are considered more beneficial than single applications.

VEGETABLE CROPS 1 - 2 pts/acre (1/4 - ½ liters)

Use a minimum of 10 gallons (40 liters) of water per acre.

FIELD CROPS 1 - 4 pts/acre (1/4 - 1 liter)

Apply **NUTRAPLEX CMM** on field crops using the following dilution rates:

Aircraft and low volume sprayers: Use a minimum of 10 gallons (40 liters) of water per acre.

Conventional sprayers: Use a minimum of 20 gallons (80 liters) of water per acre.

SPREADER

NUTRAPLEX CMM can be used as a spreader at 1 - 2 quarts (1 - 2 liters) per 100 gallons (400 liters) of water.

ACIDIFYING

NUTRAPLEX CMM has an acidifying effect on high pH water.
