

# NUTRAPLEX® WESTERN NUT CROP MIX

## COMPLEXED MICRONUTRIENTS

To Prevent and Correct  
Micronutrient Deficiencies

### GUARANTEED ANALYSIS

Zinc (Zn).....	3.00%
Copper (Cu).....	2.00%
Manganese (Mn).....	2.00%
Sulfur (S).....	4.00%

Derived From Copper Sulfate, Zinc Sulfate, and Manganese Lignosulfonate.

## PRODUCT INFORMATION

### CROPS

**NUTRAPLEX W.N.C.M.** can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses, and most other crops.

**NUTRAPLEX W.N.C.M.** is a complexed liquid micronutrients for foliar and soil applications to agricultural crops. **NUTRAPLEX W.N.C.M.** is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue and root system of the plant and quickly translocated within the plant.

**NUTRAPLEX W.N.C.M.** is compatible with most insecticides, fungicides, herbicides, liquid fertilizer, and other foliar micronutrients. It is used on most field and row crops, trees, vines, turf, and ornamentals. **NUTRAPLEX W.N.C.M.** can also be used as an acidifying and dispersing agent in water solutions.

**NUTRAPLEX** micronutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soils (pH3) to high alkaline soils (pH 8.5) containing considerable calcium carbonate (free lime). **NUTRAPLEX** is effective under dry land and irrigation farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective **NUTRAPLEX** micronutrients are than other sources of micronutrients. **NUTRAPLEX** micronutrients are unique in that they can be used in most forms of liquid fertilizers including ammonia solutions.

**NUTRAPLEX** micronutrients can be broadcast on the surface of the soil in water solutions, in fluid fertilizers including suspensions, or in particulate form. This micronutrient can be banded at planting time, side dressed or sprayed in water solutions directly on deficient plants. Under irrigation, **NUTRAPLEX** micronutrients can be added to the water of gravity and sprinkler systems. Under dry land conditions, **NUTRAPLEX** micronutrients can be applied ahead of disking, plowing, or listing. When applied to soil. **NUTRAPLEX** micronutrients can be used in combination with a nitrogen fertilizer source.

**Caution: Nutraplex W.N.C.M. contains copper. Copper can be corrosive to Black Iron, Aluminum, and Brass.**

## APPLICATION RATES

### Soil Application Rates

Maintenance Applications:	1 qt. / acre
Moderate Deficiency:	1/2 - 1 gallon/acre
Heavy Deficiency:	1 - 2 gallons / acre

In soil applications the usual carrier is water used at a rate sufficient for thorough coverage. **NUTRAPLEX** can be applied with liquid fertilizers as a broadcast or banded treatment. Use **NUTRAPLEX** at a maximum rate of 1 part **NUTRAPLEX** to 50 parts fertilizer in ammonium phosphate solutions and 1 part **NUTRAPLEX** to 10 parts fertilizer in nitrogen solutions.

### Foliar Application Rates

**TREE CROPS:** 1/2 - 1 gallon/acre - Apply **NUTRAPLEX W.N.C.M.** on tree crops using the following dilution rates: **Aerial Application:** Use a maximum of 1 quart (1 liter) of **NUTRAPLEX W.N.C.M.** per 5 gallons of water. **Dilute Spray:** Use a maximum of 1 quart of **NUTRAPLEX W.N.C.M.** per 200 - 500 gallons of spray solution. **Concentrated Spray:** Use a maximum of 1 gallon of **NUTRAPLEX W.N.C.M.** per 50 - 150 gallons of concentrated spray solution.

If trees are sprayed several times a year the above application rates can be split according to the number of yearly applications. Split applications are considered more beneficial than single applications.

**VEGETABLE CROPS:** 1 - 2 pts/ acre - Use a minimum of 10 gallons of water per acre. **FIELD CROPS:** 1 - 4 pts/acre per acre. Apply **NUTRAPLEX W.N.C.M.** on field crops using the following dilution rates: **Aircraft and low volume sprayers:** Use a minimum of 10 gallons of water per acre. **Conventional sprayers:** Use a minimum of 20 gallons of water per acre.

**SPREADER:** **NUTRAPLEX W.N.C.M.** can be used as a spreader at 1 - 2 quarts (1-2 liters) per 100 gallons of water.

**ACIDIFYING:** **NUTRAPLEX W.N.C.M.** has an acidifying effect on high pH water.
