**PRODUCT INFORMATION**

**NUTRAPLEX 5-18-5** is a highly concentrated nutritional solution. It is designed to meet the need for a soluble liquid minor element spray containing certain nutrients proven to be of value when applied as a properly timed foliage spray.

**NUTRAPLEX 5-18-5** is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissues of the plant and can be translocated within the plant. **NUTRAPLEX** is compatible with most insecticides and minor elements. It is designed for use as a supplement to a well-balanced fertilizer program.

**NUTRAPLEX 5-18-5** nutrients can be applied by conventional ground rig, concentrate sprayer, and by air. For improved leaf absorption add 1-3 qts. (1-3 liters) per acre of **NUTRAPLEX 5-18-5** with Mineral Spray products. **NUTRAPLEX 5-18-5** also has a buffering effect on hard water.

**NUTRAPLEX 5-18-5** products are designed to supplement a well-balanced fertilizer program and ensure the plants obtain proper nutrients during high growth periods when any drop in nutrients will result in a production drop.

**NUTRAPLEX 5-18-5** nutrients have corrected deficiencies of a great many row crops, vegetables and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soils (pH 3) to high alkaline soil (pH 8.5) containing considerable calcium carbonate (free lime). **NUTRAPLEX 5-18-5** is effective under dry land and irrigation farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective **NUTRAPLEX 5-18-5** nutrients are than other sources of nutrients.

Nutraplex and Mineral Spray are Registered Trademarks of Western Nutrients Corp.
